

MAPEI® and LEED®

MAPEI has been leading our industry with environmentally friendly and sustainable products since the 1980s. Long before the industry recognized the need for healthier and safer products, MAPEI succeeded in developing products that were sustainable. MAPEI has been a strong supporter and promoter of the LEED certification program(s) since their initial launch in 2000.

MAPEI's 8-Point Advantage

LEED has several performance areas in which individual points can be obtained. Points are awarded based on the overall adherence of materials used within a credit grouping. (For example, in *Low-Emitting Materials, Carpet Systems*, consideration is taken for both the adhesive and carpet.)

Unlike most companies, MAPEI's innovative and diverse grouping of products and environmental practices can contribute toward up to eight (8) points in 2 separate performance areas required for your LEED certification.

- In the Indoor Environmental Quality performance area, MAPEI products can contribute toward 1 point in each of the following areas:
 - (1) *Low-Emitting Materials, Adhesives & Sealants;*
 - (2) *Low-Emitting Materials, Paints & Coatings;*
 - (3) *Low-Emitting Materials, Carpet Systems; and*
 - (4) *Low-Emitting Materials, Composite Wood & Agrifiber Products*
- In the Materials and Resources performance area, MAPEI products can contribute toward 1 point in each of the following areas:
 - (1) *Recycled Content, 10%;*
 - (2) *Recycled Content, 20%;*
 - (2) *Regional Materials, 10%; and*
 - (3) *Regional Materials, 20%*

 – Denotes products containing MAPEI's BioBlock™ technology. BioBlock technology has been added to select MAPEI products to help inhibit the growth of various types of odor- and stain-causing mold, mildew and bacteria. BioBlock technology provides built-in antimicrobial protection without expensive additives, extra steps or added time. For the most current information on BioBlock technology, visit www.mapei.com.
